

# CIPA-USA FastHitch

Align any trailer hitch  
*- by yourself -*  
without leaving the driver's seat!

1

The view of the CIPA-USA FastHitch from the rearview mirror gives the driver a clear, unobstructed view of the hitch and ball.

This makes alignment a snap and requires only one person.

2

Slide the mirror arms onto the pickup truck gate, or use the suction cups for mounting on the front or back of virtually any vehicle.

The special convex mirror gives you a broad field of vision.

3

Your FastHitch can be used for any type of trailer: boat, snowmobile, camper, livestock, etc. With CIPA-USA FastHitch, you can get hitched!

4

The FastHitch folds easily to a compact size which stows away nicely in a rear seat storage bin or cargo area toolbox.

Model No. 11955

Patented

1 Year Warranty
